Simona Gabriela Bungau

ISBN 978-3-0365-6955-0 (Hardback)

ISBN 978-3-0365-6954-3 (PDF)

Pharmacology and Pharmacognosy is organized into twelve articles that explore therapeutic potential of different natural products from land and marine. The articles contain highly detailed coverage of information that has been overseen by an editorial board made up of well-respected, field-leading experts. The content in this book offers readers an in-depth and easily accessible reference work on every aspect of natural product research surrounding the pharmacology, medicinal chemistry, pharmacognosy, and bioinformatics of all natural products and their scaffolds, their mechanism of action, and their therapeutic values. These elements are essential to be selected as future drugs are almost never tested and developed in the actual therapeutic system, but rather in test systems from which parameters must be determined to predict activity in systems of varying ambient physiology. As different technologies rapidly evolve, there is an ever-increasing level of knowledge about the natural products, along with increasing capability to utilize bioactive molecules to predict new drugs against chronic diseases, all of which must be communicated to professionals in varying fields.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
