In the urological sphere, the number of tumor malignancies caused by cancer is continuously growing in Western countries. Although this is mainly due to the contemporary increase in the life expectancy of people in these geographic areas, many other factors are also contributing to this growth. Urological cancer is a complex and varied disease which affects different organs and mainly affects the male population. In fact, in most statistics, kidney, prostate, and bladder cancer are regularly included in the top-ten list of the most frequent neoplasms in males. The female population, however, has also been increasingly affected by renal and bladder cancer in the last decade. From these facts, it is clear that urological cancer is a problem of major concern in developed societies. This Topic Issue of *Cancers* intends to shed some light on the complexity of this field and will consider all useful and appropriate contributions from scientists and clinicians in order to improve urological cancer knowledge for patients' benefit.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
