Rupert Ecker

ISBN 978-3-0365-7116-4 (Hardback)
ISBN 978-3-0365-7117-1 (PDF)

In this Special Issue, authors from nine countries on five continents provide overviews on and insights into current research topics related to the ‘Genetic Complexity of Hormone-Sensitive Cancers’. The chapters cover topics on completely novel technologies and instruments revolutionizing our view of biological entities, and also, novel extensions and revisions of existing and well-established technologies such as genetic probes and bar-coding techniques, which add a new dimension to microscopy, as they allow us to visualize DNA sequences and mRNA in situ. With this Special Issue, the editors wanted to create a forum for the international biomedical research community to compile their data on the genetic complexity of cancer in a unique resource. While this collection of articles cannot certainly claim completeness in any way, it represents an attractive collection of the different aspects of hormone-dependent cancers and will hopefully encourage further targeted research.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
