It was recently reported that pollution was responsible for 9 million premature deaths in 2015, making it the world's largest environmental risk factor for disease and premature death. Human and industrial activities generate various forms of residual wastes and by-products in a solid, liquid, or gaseous state. Waste generation starts with simple processes such as living, eating, and breathing. Managing waste and minimizing associated environmental impacts have become more challenging as worldwide populations and economies continue to grow. Once these hazardous chemicals are present in the environment, people can become exposed to them. Human health can be influenced by many factors, including exposure to physical, chemical, biological, and radiological contaminants in the environment.

This reprint comprises research papers related to the aspects of environmental exposure to multiple toxic chemicals and human health. The manuscripts are focused on toxicology, biomonitoring, exposure and risk assessment, and endocrine disruptors.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

## Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

## Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

## High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

## High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

## Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
