Edited by  
Andrea Ehrmann

ISBN 978-3-0365-7787-6 (Hardback)

ISBN 978-3-0365-7786-9 (PDF)

Electrospinning can be used to prepare nanofibrous membranes from diverse polymers. The large surface-to-volume ratio makes them suitable for diverse fields of applications, from filters to catalysts to tissue engineering.

Here, we search for the latest developments dealing with nanofiber mats for biomedicine. From wound healing to slow release, and from tissue engineering to stem cell differentiation, nanofibrous membranes can be found in a broad range of biomedical applications. For these utilizations, their chemical as well as physical properties are important, such as hydrophobicity, fiber morphology, membrane porosity, mechanical strength, etc. This Special Issue focuses on nanofibrous membranes for biomedical applications, measuring and optimizing the correlated membrane properties. It covers the full range from basic research on new materials and producing novel electrospun structure to drug release to cell growth on nanofiber mats.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

## Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

## Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

## High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

## High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

## Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
