Marine environmental conditions are very distinct in the Yellow Sea, the East China Sea, and the East/Japan Sea. Physico-chemical properties and subsequently biological characteristics are different among the three seas. During the recent decades, dramatic changes in physical structure and vertical distribution of chemical properties were reported in the Yellow Sea, the East China Sea, and the East/Japan Sea. However, we do not know much about the current status of the marine ecosystems in these three distinct seas to date. Since 2018, the integrated ecosystem assessment for ecosystem-based fisheries management have been implemented in the Yellow Sea, the East China Sea, and the East/Japan Sea by the National Institute of Fisheries Science, Korea. This special volume will provide basic information for the current status of the marine ecosystems and an important background for the future monitoring of marine ecosystem responses to ongoing climate changes in the Yellow Sea, the East China Sea, and the East/Japan Sea.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
