The discipline of aquaculture ecology is developing rapidly and has generated much valuable progress in recent decades. This reprint mainly describes the recent advances in the individual ecology of commercial aquatic organisms, the ecology of aquaculture systems, the interaction between aquaculture activities and the environment, the structure of function of microbial communities, the principles of environmental management in aquaculture ecosystems, etc.

Aquaculture is one of the fastest-growing human activities, and has achieved high and predictable yields in recent decades. However, the industry is also facing numerous long-term challenges, such as environmental pollution, excessive resource consumption, etc. Aquaculture ecology aims to lay an ecological foundation for the sustainable development of aquaculture. This reprint hosts 10 papers and 1 editorial, with topics including, but not limited to, the impact of floating raft aquaculture on the hydrodynamic environment of an open sea area; the bioremediation of aquaculture wastewater using seaweed; the production environment in biofloc systems; the effects of various environmental factors, including temperature, carbonate alkalinity and protein levels in compound feed on commercial aquatic species; advances in ecology research on major integrated rice field aquaculture models in China, etc. The advances in aquaculture ecology research collected in this reprint can provide references for the sustainable development of aquaculture.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
