This reprint presents original research as well as reviews on current food safety issues. A wide range of biological hazards, food commodities and measures to assess, control and manage hazards are covered. With respect to food commodities, meat, milk/dairy and fish/seafood are covered, but also wild game and edible insects. The epidemiology of parasites and pathogenic bacteria (*Clostridioides difficile* and *Listeria monocytogenes*) in various food chains is reviewed, as well as the impact of food technology on food safety.
