ISBN 978-3-0365-8136-1 (Hardback)
ISBN 978-3-0365-8137-8 (PDF)

Heme oxygenase (HO)-1 is a well-known, cytoprotective enzyme, responsible for the enzymatic conversion of heme into the anti-apoptotic and antioxidant by-products, biliverdin, bilirubin and carbon monoxide. However, HO-1 also regulates responses via mechanisms that are independent of the generation of heme degradation products. The current Special Issue contains research and review articles on the effect of heme oxygenase on immune-related cellular and physiological cascades and functions including effects on innate immunity, adaptive immunity, inflammation and complement activation. A description of the role of HO-1 in immune regulation directly or via its by-products is depicted on various forms of infection, viral and bacterial, immune-mediated injury such as renal injury, allergic airway inflammation, cancer and metabolism. Thus, the current Special Issue aims to serve as a detailed, analytical and up-to-date guide of the recent advances on the immunomodulatory properties of HO-1.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
