ISBN 978-3-0365-8278-8 (Hardback)

ISBN 978-3-0365-8279-5 (PDF)

Archaeology, geography, and the Earth sciences are an integrated field devoted to researching nature, the environment, humanity, and the social sciences. Remote sensing systems have been widely applied for data acquisition at various spatial scales. Innovations in image and signal processing, IoT, big data, and deep learning models induce new potentials in the reconstruction and exploration of ancient people's material culture and lives. This Special Issue focuses on applying remote sensing techniques coupled with a data mining method to analyze and discuss humanity-, geography-, and environment-related contexts. The formal integration of archaeology and geography has been conducted over the past twenty or thirty years. In spite of this, continuous innovations, whether in imaging spectroscopy and multimodal imaging or in imaging computing using deep learning models, still motivate scholars to address related issues. The aim of this Special Issue is to compile the latest achievements in the field and to open up a forum where scholars can contribute their unique findings.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
