This Special Issue is a complimentary work of over 70 scholars from various countries, including Poland, Ukraine, and the Czech Republic. The issues analyzed in the 16 articles primarily focus on energy generation in rural areas, particularly in the agricultural sector. They examine specific crops or livestock production and range from case studies of individual countries to the level of the European Union.

Published works collectively review the economic and environmental issues of energy generation. These include the potential of agricultural production to serve as a resource for bio-energy generation, the economic and energy efficiency of farms and rural residential housing, and the impact of agricultural production on greenhouse gas emissions. They also explore the possibility for farms to achieve energy self-sufficiency, as well as the progress and gaps in the development of renewable energy generation.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
