The ninth national conference on applied geochemistry in China will be held in Chengdu, hosted by the committee of applied geochemistry, Chinese Society for Mineralogy, Petrology and Geochemistry (CSMPG). In order to facilitate the academic exchange on applied geochemistry, this Special Issue is intended for the presentation of new advances and case illustrations in the field of applied geochemistry. The guest editors of this Special Issue are Dr. Gong, a professor from China University of Geosciences (Beijing), and Dr. Shi, a professor from the Chengdu University of Technology. This Special Issue was opened on 27 June 2022 and closed on 1 July 2023. A total 14 scientific papers have been published that capture various hot and challenging issues in applied geochemistry. These articles belong to three broad groups: (i) new advances and case illustrations in resource exploration which focus on exploration techniques in covered areas and anomaly determinations of geochemical survey data; (ii) new advances and case illustrations in environment assessment which focus on heavy metals of soils, soil nutrients assessment and geochemical survey of a top geoherb; and (iii) new advances in the basic theory of geochemistry such as elemental abundances of moon samples, equation of state of fluid mixtures, the formation's dynamic mechanism of a dendrite, provenance indices of geological materials, etc. In which, a promising concept, geochemical gene, was introduced and illustrated in tracing soils and determining geochemical anomalies.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
