Special Issue Reprint

New Science of Boron Allotropes, Compounds, and Nanomaterials

www.mdpi.com/books/reprint/7701

Edited by

Takahiro Kondo

Iwao Matsuda

Josep M. Oliva-Enrich

ISBN 978-3-0365-8327-3 (Hardback)

ISBN 978-3-0365-8326-6 (PDF)

Elemental boron has attracted researchers because of its large number of allotropes, thus providing a variety of scientific aspects within physics and chemistry. Boron compounds and boron nanomaterials have also shown various polymorphs that have been investigated as functional materials for our society. The uniqueness of the boron atom is due to its high frequency of electron multi-center bonding with neighboring atoms, which is still a significant topic in theoretical and computational research. Recently, there have been reports on the realization of two-dimensional (2D) or planar boron nanomaterials, the so-called borophenes. As expected, observations of the various 2D polymorphisms have triggered a considerable number of research lines worldwide. This reprint presents a collection of such papers at the forefront. The contributed papers are transferred from the Special Issue of “New Science of Boron Allotropes, Compounds, and Nanomaterials” in the journal *Molecules*. The issue was launched in 2021, and it aimed to provide a forum for the dissemination of the latest information on boron allotropes, compounds, and nanomaterials.

Order Your Print Copy

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
