ISBN 978-3-0365-8562-8 (Hardback)
ISBN 978-3-0365-8563-5 (PDF)

Food inspection is the primary method employed in order to ensure the quality and safety of food. There are some hazard factors, such as pesticide residue, veterinary drug residue, heavy metals, biotoxins, and illegal additives, that represent a great threat to the quality and safety of food. Immunoassay is a rapid detection method with high efficiency and accuracy, and is the mainstream rapid detection method in food inspection. The syntheses of hapten, the development of antibodies, immunoassay methods including colloidal gold immunochromatography, enzyme-linked immunoassay, fluorescence immunoassay, chemiluminescence immunoassay, and bio-barcode immunoassay have been research hotspots in recent years.

The aim of this Special Issue is to provide an overview of the latest research in the following fields: i) the design and synthesis of hapten for key hazard factors; ii) the development of monoclonal antibodies, nanobodies, etc., for pesticide residue, veterinary drug residue, heavy metals, biotoxins, and illegal additives; iii) structure–activity relationship between hapten and antibody properties; iv) the development of novel immunoassay detection methods in food inspection. Additionally, we welcomed reviews addressing the field of immunoassay application in food inspection.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
