Edited by Mohammed S. Lamhamedi Damase P. Khasa Steeve Pepin

ISBN 978-3-0365-8768-4 (Hardback) ISBN 978-3-0365-8769-1 (PDF)

Forest plantations are among the tangible solutions to meet the world's needs for timber and wood products (e.g., timber, firewood, pulp, and paper) and other ecosystem services that are constantly increasing and compensate for the loss of millions of hectares of forests caused by the increase in the severity and frequency of fires, insect attacks, and environmental stresses in humid, arid, and semiarid zones. Faced with these major constraints and challenges in the context of climate change, it is not enough to plant millions of seedlings, but we must ensure the genetic selection of seeds adapted to current and future climates, the morphophysiological quality of seedlings, the quality of sites, and the optimization of cultural as well as sylvicultural practices (e.g., from seeds to sustainable plantations) to achieve the objectives of various programs (reforestation and wood production; restoration of damaged, degraded, or destroyed ecosystems; desert greening; and agroforestry) in terms of survival, growth, and yield. This Special Issue deals with different facets and topics of the seedling production chain in different countries and continents, from growing media to planting performance related to reforestation, restoration, and agroforestry programs.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
