ISBN 978-3-0365-8857-5 (PDF)

Zoonoses represent up to 60% of infectious diseases and 75% of new diseases in humans. They can cause considerable economic losses each year, as recently illustrated by the COVID-19 pandemic. Several factors, such as intensive agricultural and livestock practices, human population growth, and international travel, are known to contribute to the emergence of zoonotic diseases. This Special Issue will cover the topic of One Health and its application in the prevention and control of emerging diseases. The One Health concept recognizes that the health of humans, animals, vectors, and their ecosystems are closely interconnected. To better understand and respond to zoonotic and emerging diseases, there is a need for coordinated, collaborative, multidisciplinary, and cross-sectoral approaches including human health, veterinary health, and environmental health.

In this Special Issue, we invited colleagues to submit original research articles and scientific reviews to assemble a collection of papers highlighting advancements in our understanding of all aspects related to the surveillance and control of zoonotic disease, including (but not limited to) 1) the development of new diagnostic tools, 2) outbreak investigation and surveillance program for emerging pathogens (including One Health approaches), and 3) understanding of the mechanisms of pathogen emergence.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
