The construction industry has long been a driving force behind global economic growth; however, despite its boom, it still faces a host of challenges, including lagging productivity, labor, and environmental sustainability. It is therefore crucial for the industry to undergo industrial transformation and upgrade to ensure its continued and healthy development. Intelligent construction provides a promising solution to these challenges. Over the past two decades, intelligent and computer technologies have revolutionized the construction industry, improving sustainability, safety, and productivity. These technologies have become indispensable tools for construction professionals, enabling them to collaborate, communicate, and perform tasks more efficiently. As these technologies continue to advance, there is still much scope for researchers and industry practitioners to promote digital and intelligent transformation in this field. This Special Issue aims to provide a platform to explore state-of-the-art knowledge, practical implementations, and cutting-edge innovations in the area of intelligent and computer technologies and their applications in construction. Intelligent construction is a complex topic that encompasses the entire project life cycle. The papers in this Special Issue provide excellent examples of the development and application of Building Information Modeling (BIM), blockchain, and deep learning to improve safety, quality, and sustainability in construction projects.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
