Advances in Sheet Metal Forming Processes of Lightweight Alloys

www.mdpi.com/books/reprint/7972

Edited by Mateusz Kopec Denis Politis

ISBN 978-3-0365-8916-9 (Hardback) ISBN 978-3-0365-8917-6 (PDF)

With the continuously growing need for more fuel-efficient and sustainable vehicles, the characterisation and modelling of metal forming processes has been indispensable in the development of new products. In the automotive and aviation sector, low-strength structural components are commonly produced from aluminium alloys, and higher-strength structural components are made from ultrahigh-strength steels (UHSS) and titanium alloys. The main issue experienced during the hot forming of complex-shaped components from difficult to form alloys is that they are time-, energy- and cost-intensive. The aircraft industry currently uses methods such as superplastic forming (SPF), superplastic forming with diffusion bonding (SPF-DB), hot stretch forming, hot gas pressure forming and isothermal hot forming. Moreover, novel techniques have been developed to produce complex-shaped structural components including the solution heat treatment, forming and in-die quenching (HFQ), quick-plastic forming, hot stamping using rapid heating and fast light alloy stamping technology (FAST). This Special Issue focuses on the characterisation techniques and advanced predictive models developed for such processes.

MDPINBOOKS Publishing Open Access Books & Series

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

ᆔ

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
