Edited by
Ludovico Abenavoli
Marcello Candelli

ISBN 978-3-0365-8940-4 (Hardback)
ISBN 978-3-0365-8941-1 (PDF)

Gastroenterology and hepatology are fields of research that have improved considerably in recent years in terms of clinical approach, diagnosis, and therapy. However, there is still much to be clarified and explored, and many questions remain unanswered. Therefore, basic research, including translational and clinical discoveries, supported by technological innovations such as artificial intelligence, will enable further steps toward better, more refined treatments for many digestive diseases. The challenge of modern medicine will therefore be to connect these two fields to ensure optimal patient management. Further innovations will help clinicians to improve clinical practice, establish new guidelines, and provide personalized treatment based on patient characteristics. The aim of this Special Issue is to highlight recent advances and future challenges in gastroenterology and hepatology.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
