Discover the latest advancements in the world of chemical organic compounds with our Special Issue, "Synthesis, Application, and Biological Evaluation." Leading researchers have converged to showcase a diverse array of synthesized compounds, nanostructures, and extractions from plant and animal sources. Explore in silico analyses and biological assessments utilizing cutting-edge methodologies. Highlights: 1) Outstanding Antibacterial Activity: Chitosan/Fe(III)/deferoxamine nanoparticles outperform conventional drugs, showing promise in in vivo and in vitro applications. 2) Innovative Nanocomposites: Poly(o-anisidine)/BaSO₄ nanocomposites exhibit potential antibacterial capabilities with tunable characteristics. 3) Novel Compounds: Discover N-acyl- α -amino acids, 4H-1,3-oxazol-5-ones, 2-acylamino ketones, and 1,3-oxazoles with remarkable antibacterial and antioxidant properties. 4) Anti-Inflammatory Agents: Explore hybrid molecules with enhanced anti-inflammatory and antioxidant activity, outperforming standard drugs. 5) Osteoporosis Prevention: Ethanolic extracts of *G. littoralis* show promise in preventing osteoporosis. 6) Perfume Longevity: Deuterated ambrox extends perfume shelf life, a fascinating innovation in the fragrance industry.

This Special Issue represents the cutting edge of chemical research and applications, offering solutions to global challenges. Join us in the pursuit of knowledge and innovation regarding chemical organic compounds.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
