Edited by
Xiaogong Hu

ISBN 978-3-0365-9022-6 (Hardback)

ISBN 978-3-0365-9023-3 (PDF)

This reprint focuses on applications of different Space Geodetic Techniques on Earth exploration and geodetic research. The topics range from the classical estimation of Earth observation at high precision, to more comprehensive aims and scales. Special attention is given to the new orbit determination method, development status and service performance of the BeiDou global navigation system, intersystem bias of satellite onboard receiver and precise orbit determination of low-earth-orbit vehicles, ultra-rapid satellite clock offset estimation, variability of GNSS-derived water vapor, refined gravity field modeling in China, local enhancement of marine gravity fields assisted by satellite SAR data, enhanced prediction models of universal time, etc.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
