Edited by Xun Wang Zhiyuan Wang Xin Zhao

ISBN 978-3-0365-9126-1 (Hardback) ISBN 978-3-0365-9127-8 (PDF)

The recognition of global climate change as an environmental issue has drawn attention to the climatic impact of human activities. Scientists and environmentalists have pointed out that human-induced climate change results from disturbances in all aspects of the environment. Among them, aquatic environments (including water, sediments, aquatic organisms, etc.,) are closely related to all kinds of human interference. However, they are under increasing stress due to climate change and human disturbances, such as an increased input of pollutants, a loss of biodiversity and a decrease in ecological functions. Fortunately, realizing the urgency and importance of the matter, researchers have started to work on coping strategies, including effective water treatment and energy recovery. This Special Issue focuses on revealing the effects of climate change and anthropogenic disturbances on water ecological environments, analyzing physical, chemical and biological aspects.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

#### **Open Access**

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

#### **Author Focus**

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

### **High Quality & Rapid Publication**

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

## **High Visibility**

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

## **Print on Demand and Multiple Formats**

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
