ISBN 978-3-0365-8895-7 (PDF)

Autophagy is a conserved degradative mechanism essential for cellular homeostasis in eukaryotic organisms. It is a cellular response mechanism that helps cells adapt and survive under various stressful conditions. It involves the degradation and recycling of cellular components to maintain cellular homeostasis and protect against damage from stressors like nutrient deprivation, oxidative stress, infection, and protein misfolding. However, the understanding of the molecular mechanisms of autophagy regulation is still in significant development, including the involvement of neurotransmitters and small signaling molecules, such as those produced under ROS, RNS and RSS. Dysregulation of autophagy has been implicated in various diseases, making it an important area of research to improve biomedical therapies and strategies for overcoming the challenges from environmental stresses. Therefore, this Special Issue aims to review the current developments regarding autophagy research.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
