“Molecules from Side Reactions II” is the second edition of the Special Issue “Molecules from Side Reactions”. Both the Special Issues belong to the section “Organic Synthesis” of the journal *Molbank* (ISSN 1422-8599). “Molecules from Side Reactions II” showcases brief papers whose main topic is the synthesis and characterization of molecules obtained from unexpected and/or unpredictable synthetic routes. This Special Issue was revealed to be an important discussion forum for the dissemination of multidisciplinary research results.
