Shai M. Rozen

With increasing speed, new diagnostic and therapeutic approaches for facial nerve disorders are being published. Many of them have improved decision-making, treatment, and the rehabilitation of patients. Unfortunately, there is often a lack of high-quality studies that prove long-term effects or identify subgroups that are of particular benefit. Even a reliable characterization of patients with facial nerve disabilities is often complicated. Therefore, evidence-based management remains challenging.

With this Special Issue on the topic of "Evidence-Based Diagnosis and Management of Facial Nerve Disorders", we have brought together experts from various fields, including speech pathology, plastic surgery, otolaryngology, neurology, and physical therapy, to present the latest developments in relation to facial nerve disorders and to present a great variety of topics to our readership. We can see that the topic of facial nerve palsy offers a vast and dynamic spectrum of developments, and hope that the research presented in this Special Issue shows the importance of a multidisciplinary approach. We hope it will not only enhance our knowledge of this condition, but also ultimately improve patient outcomes and their quality of life to some extent.

MDPI\Books
Publishing Open Access Books & Series

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access
Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus
Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication
MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility
Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats
MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
