The COVID-19 pandemic caused a change in the pattern of various infectious diseases. Evidence suggests that the same nonpharmaceutical interventions employed to prevent the transmission of SARS-CoV-2 likely led to the reduced incidence of influenza in various regions across the globe. However, the COVID-19 pandemic caused disruptions in the reporting of other infectious diseases such as sexually transmitted diseases and other coronavirus infections. Decreased reporting of notifiable infectious diseases and conditions during the pandemic remained a major concern for health authorities. Ascertaining the impact of the COVID-19 pandemic on the transmission patterns of other infectious diseases holds significant implications for public health, but this topic has not yet been studied to a greater extent. On the other hand, the scope and relevance of clinical microbiology are appreciated more than ever. Viral structure, transmission, diagnosis, and optimal sterilization and disinfection process were the key elements that clinical microbiologists shared for the betterment of the community throughout the pandemic. This issue underscores various aspects of the advancements in infectious diseases and clinical microbiology during the ongoing COVID-19 pandemic. This Special Issue highlights the need for integrated efforts to control any future outbreak along with parallel management of other infectious diseases.

Order Your Print Copy

You can order print copies at

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
