Vincenzo Scordia

ISBN 978-3-0365-9588-7 (Hardback)

ISBN 978-3-0365-9589-4 (PDF)

This Special Issue focuses on the comprehensive understanding and novel treatments in the realm of cornea and ocular surface diseases. Ranging from the relatively benign manifestations of keratoconjunctivitis sicca to more critical conditions such as corneal ulcers, ocular surface diseases pose a considerable challenge in clinical ophthalmology. Such conditions can severely compromise the transparency of the cornea, often necessitating interventions such as keratoplasty. A significant emphasis of this edition is on the paramount importance of pre-surgical optimization. A successful keratoplasty is often predicated on the health of the ocular surface. Through a series of insightful articles, the importance of enhancing tear function, rehabilitating the normal lid anatomy, and ensuring a robust limbal stem cell supply is elucidated. Properly addressing these factors has a direct bearing on the success rate of the subsequent surgical intervention. Another highlight of this Special Issue is the presentation of cutting-edge treatments. Researchers from around the globe share their findings, detailing advancements in both surgical and non-surgical treatments. These range from innovative surgical techniques and tools to groundbreaking pharmaceutical agents that hold promise in managing and possibly reversing some of these conditions. In summary, this Special Issue serves as a repository of the latest knowledge in the management of cornea and ocular surface diseases, aimed at both the seasoned ophthalmologist and budding researchers in the field.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
