Land use is the projection of human activities in space, and it has become an important insight into the transformation and reconstruction of human society and economy. Rural land use in China is undergoing rapid transformation driven by the rapid development of science and technology. Effectively grasping the change and transformation process of rural land use and its internal mechanism provides an important reference for revealing the inherent laws of China's rural development. Rural land use is closely related to the rural vitalization strategy and urban–rural integration in the new era. An in-depth study of China's rural land use and policy reform provides the basis of knowledge for formulating and optimizing urban–rural relations. This Special Issue focuses on the changes, effects, and regulation of rural land use in China, focusing on its main contradictions and solutions, building a cooperative network and sharing platform for rural land use research from a multidisciplinary perspective, and further deepening the theoretical innovation and practical application of rural land use research. We invited scholars from various disciplines to contribute to the Special Issue, especially with papers on the subjects of theoretical innovation, technological innovation, and practical innovation in this field.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
