This reprint delves into the latest advancements in aquaculture techniques emerging from China. It provides a comprehensive update on the research and technological developments in various aspects of aquaculture, including biotechnology, ecotechnology, feeding technology, and environmental technology. The reprint covers a wide range of topics, such as the use of biotechnology to identify and characterize genes that enhance resistance to bacterial infection and environmental stress. It also explores feeding technology that improves immunity and stress resistance in aquatic organisms. Additionally, the reprint discusses the detection of the impact of thermal stress on marine fish immunity, the manipulation of light color to enhance algal growth, and the utilization of integrated multi-trophic systems to boost production. With a focus on marine fish, shrimp, sea cucumbers, sea urchins, and algae, this reprint showcases groundbreaking research that paves the way for future advancements in aquaculture. These innovative technologies are expected to have far-reaching implications for other species in the field of aquaculture.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
