In the current context of global change and global interconnectedness, our role in connecting the dots and finding solutions to current and future problems is very important. When talking specifically about the management of forests, we can see its continuous evolution and, more importantly, its adaptation to contemporary challenges. As is well known, forest ecosystems play an essential role in our economy, human wellbeing and global wellbeing. More specifically, one of the main challenges in forest management is represented by the sustainability of resources and need to conserve biological diversity. The best way is to think globally, to find patterns that repeat themselves and to investigate solutions that can help us to prepare a better future. In this regard, we think that it is essential to review papers that present interesting findings that could guide us. The first step was to select 18 articles from a wide range of countries located on three continents, including Brazil, Bulgaria, Ecuador, Germany, Malaysia, Peru, Poland, Romania, Slovakia, and Slovenia. Our main goal was to analyse the regionally specific aspects, as well as general aspects that can be applied worldwide. Using this approach, we narrowed our research to eight sub-domains: natural and human disturbances, genetics, site conditions, tropical forest, peri-urban forest, forest soils, forest reserves, and mountain ecosystems. These articles tackle themes such as peri-urban forests and their impact on urban agglomerations, ecotourism, cultural heritages and practices from local communities, human interventions and best practices.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

### **Open Access**

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

### **Author Focus**

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

### **High Quality & Rapid Publication**

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

### **High Visibility**

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

### **Print on Demand and Multiple Formats**

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
