The Special Issue titled Nursing Care for Cancer Patients was led by Prof. Li and was published with 11 papers when it closed. The Second Edition collects all types of study design, including papers reporting systematic reviews and meta-analyses, quantitative, qualitative, or mixed methods studies, case studies, and other designs, in accordance with cancer care associated with supporting cancer survivors, family caregivers, and oncology professionals. We are particularly keen to present studies focusing on colorectal cancer, long-term survivorship care, supporting self-management and rehabilitation, oncology-nurse-led survivorship care, eHealth, or web-based interventions in this regard.
