Edited by
Shaodong Zhou

ISBN 978-3-0365-9689-1 (Hardback)
ISBN 978-3-0365-9688-4 (PDF)

Nanoparticle catalysts continue to be in the spotlight due to their unique performances in various chemical processes. With rapid progress in nanoscience and technology, nanoparticle-mediated reactions can be carried out in different systems regarding both gas and condensed phases. Due to the doping, surface, volume, and quantum size effects, elements in nanoparticles exhibit properties which are rather different from the ones in bulk materials, thus possibly affording higher catalytic activity and selectivity for specific reactions. This Special Issue aims to show insight into the recent advances in nanoparticle catalysis and focuses on the advantages, limitations, and future directions of nanoparticle-mediated reactions in both chemical and biological systems.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
