## Mechanism and Engineering Research on Processing, Storage and Preservation of Fresh Food

www.mdpi.com/books/reprint/8594

Edited by Min Zhang Hong-Wei Xiao

ISBN 978-3-0365-9987-8 (Hardback) ISBN 978-3-0365-9988-5 (PDF)

The COVID-19 pandemic has highlighted the fragility and importance of the fresh food supply chain system. The pandemic has affected the production and transportation of high-value, labor-intensive, perishable, and nutritious fresh foods, such as fruits and vegetables, meat, and aquatic products. On the other hand, changes in the characteristics of microorganisms, production methods, environment, and ecology, and the increasing amount of fresh food in world markets have created new risks. Over the years, food preservation processes have satisfied consumers' increased demand for high-quality fresh foods. Consequently, exploring the novel technologies of processing, storage, and preservation is becoming essential for fresh food. Innovative and promising technologies have been adopted to ensure safe productions with changing consumer needs and fresh food-health issues. This Special Issue aspired to collate a range of original research and review articles on the latest progress, challenges, and prospects of new processing, storage, and fresh-keeping technologies for fresh food.

# MDPINBOOKS Publishing Open Access Books & Series

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

#### **Open Access**

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

#### **Author Focus**

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

#### **High Quality & Rapid Publication**

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

ᆔ

#### High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

### Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
