Plant tissue culture is an important and continually emerging field applied to improve the production, propagation, and conservation of cultivated and wild plant species. This Special Issue of Horticulturae belongs to the section "Propagation and Seeds" and is dedicated to recent developments in in vitro tissue culture technologies and their use in micropropagation, in vitro plant regeneration, and the germplasm conservation of horticultural crops. The papers in this Reprint have been peer reviewed by experts and guest editors and published in Horticulturae in full open access. This Special Issue contains eleven publications, including nine research articles, one review, and one essay article, which provide a representative and valuable collection of the in vitro tissue culture technologies used for horticultural species. It also provides perspectives for future studies and offers a diverse learning experience appropriate for students, technicians, and scientists of plant sciences and plant/agricultural biotechnology.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
