Grassland ecological management and utilization is a hot topic which attracts grassland scientists around the world, and this reprint focuses on research related to the management and utilization of traditional grasslands, the restoration and management of degraded grasslands, and grassland conservation. This reprint contains empirical studies and systematic reviews regarding grassland effective management and sustainability. It includes the management of grassland species, grassland production, grassland grazing, grassland nutrients, grassland restoration, and other topics. We hope that it will serve as a meaningful resource which provides valuable insights and evidence-based strategies for anyone interested in sustainable grassland management.
