Despite the development of strong antibiotics, deaths from pneumonia are rapidly increasing due to population ageing. Since pneumonia deaths mainly affect older people, to overcome them, we should focus not only on pathogens, but also on host defense. Pathogens range from bacteria to viruses and unknown, emerging infectious diseases. Host defense includes not only immune function, but also physical function and other physiological functions. Geriatric functional declines, such as sarcopenia, dysphagia, dystussia, and frailty, play pivotal roles in the development of pneumonia in older people. Therefore, in addition to pathogen-oriented therapy, function-oriented therapy emerges as the remedy for pneumonia in older people. Comprehensive approaches with a multidisciplinary team are also important. This Special Issue reveals the importance of skeletal muscle and interdisciplinary approaches in pneumonia in older people. Impaired pharyngeal sensitivity results in delays in triggering the swallowing reflex, which is the most serious problem caused by dysphagia. Ageing weakens pharyngeal sensitivity by affecting sensory receptors, the peripheral nervous system and microcirculation, resulting in altered detection, reduced sensory conduction and an abnormal efferent response. We believe that other ageing-related deteriorations in sensation are also involved in pneumonia in older people. The relationships between sensation impairment and pneumonia in older people thus become crucial topics for future research.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
