ISBN 978-3-7258-0277-7 (Hardback)

ISBN 978-3-7258-0278-4 (PDF)

This Special Issue mainly concerns recent progress in the fields of building materials, structural mechanics, geotechnical engineering, and advanced materials and technology. Some of the studies in this Special Issue collate the latest achievements in cement and building materials research, building upon traditional research theories and techniques. This Special Issue provides a supportive basis for remediating current research and difficulties and knowledge gaps.

This field, with all its traditionalism and multidisciplinary, has profited from these developments. However, its specific features have led to a considerable scattering of literary sources and a lack of information that has been mutually agreed upon by all relevant subjects.

This Special Issue should help to overcome these problems. It provides us with an opportunity to create a compendium on novel cement and building materials, which will not only boost further scientific progress but also provide restorers and artists with a useful literary overview. It is focused on cement and building materials, and contains the most important results from different regions of the world.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

## Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

## Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

## High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

## High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

## Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
