This Special Issue aims to showcase innovative approaches and applications in sustainable modeling and processes contributing to societal development. Focusing on these advancements aims to bridge the gaps between societies, foster global harmony, and enrich the natural environment. Accordingly, the Special Issue includes research articles and reviews that demonstrate how sustainable modeling and processes can positively impact society. For instance, there are studies on sustainable energy production, eco-friendly manufacturing processes, and waste reduction and management via sustainable conversion. The ultimate aim is to highlight how these approaches can lead to a more harmonious global community while benefiting the environment.
