ISBN 978-3-7258-0380-4 (PDF)

Essential oils (EOs) are some of the most important natural products due to their various biological applications. In fact, many EOs explain crucial antimicrobial activities against several phyto-, food, and human diseases; hence, they are considered possible alternatives to synthetic drugs. The second volume of this Special Issue, entitled “Plant Essential Oil with Biological Activity II,” includes important scientific articles that cover several aspects of the use, extraction, biochemical characterization, application, and mechanisms of action of many EOs, either crude oil or their single constituents. This Special Issue also includes crucial studies regarding the phytotoxicity and/or cytotoxicity of some plant EOs. This Special Issue's second volume addresses knowledge discrepancies in science and promotes the global development of EO applications. It includes seventeen research articles covering a broad range of subjects and uses related to the biological activity of many plant EOs.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

### **Open Access**

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

### **Author Focus**

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

### **High Quality & Rapid Publication**

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

### **High Visibility**

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

### **Print on Demand and Multiple Formats**

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
