The addition of functional fillers into a polymer matrix has been extensively explored and used in many applications, among which are electronics, medicine, aerospace, energy storage, sensors, etc. With the fast development of science and technology, novel particles and their composites with multiple functions have been invented to meet new requirements. Moreover, new manufacturing methods for preparing the particles and composites are also emerging. One challenge is to prepare high-performance or functional polymer composites with a low filler content employing an easy, scale-up approach. Another challenge is to integrate the function into the composite efficiently and subtly through a rational design of the particles or the particle distribution in the polymer matrix. This reprint aims to highlight the advances and cutting-edge technologies of particles and particle-reinforced functional polymer composites. Original research articles and reviews are included and the research areas encompass the synthesis and characterization of novel particles, novel manufacturing technology for particle-reinforced polymer composites, rational design of the distribution of particles in a polymer matrix, properties of composites enhanced by particles and multifunctional polymer composites.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
