In the last few years, the scientific world has been forced to find ways to manage the SARS-CoV-2 pandemic and its many effects. Even though COVID-19 was first considered a respiratory disease, it is now identified as a systematic disease. It is common for SARS-CoV-2 to also infect the digestive system. This type of infection in patients with COVID-19 has a wide symptom range. The aim of this reprint is to evaluate and discuss the optimal management of emergency surgeries in patients with SARS-CoV-2 infection and co-infections. Furthermore, this reprint refers to rare conditions of the digestive system and emphasizes the importance of considering these entities in the differential diagnosis. Awareness of diagnostic imaging hallmarks is crucial to optimize the management of these patients. In this reprint, we discuss the risk of new-onset liver injuries due to COVID-19 in preexisting hepatic conditions, their prognosis, severity and outcome, as well as the immunosuppressant treatments administered for COVID-19 and the possibility of reactivation of the hepatic virus. Moreover, we refer to the drugs used during therapy of hospitalized COVID-19 patients, which have adverse side-effects of drug-induced liver injury —DILI. Finally, this reprint punctuates the importance of vaccination against SARS-CoV-2 in chronic digestive diseases.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

## Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

## Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

## High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

## High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

## Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
