Edited by
Toshio Hattori
Yugo Ashino

ISBN 978-3-7258-0498-6 (Hardback)
ISBN 978-3-7258-0497-9 (PDF)

The reprint describes all aspects of the fight against SARS-CoV-2 infection (COVID-19). RNA viruses are claimed to be the most common cause of infectious diseases in disasters. Distinguished medical teams in five different countries described their responses to COVID-19 for medically vulnerable people such as HIV-infected persons, the elderly, and cancer-bearing patients. The reprint also encompasses studies of serological, molecular, and image diagnosis of COVID-19. The pathogenic roles of GABA were also proposed.

It was also proposed that SARS-CoV-2 infection upregulates GABA, protecting not only the central nervous system, but also the endothelia, pancreas, and gut microbiota. Very rare cases with spontaneous pneumothorax and acute exacerbation after tocilizumab treatment were reported. This reprint teaches effective measures against the ongoing COVID-19 epidemic.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
