ISBN 978-3-7258-0728-4 (PDF)

In the last few years, the adoption of renewable technologies and energy-efficiency strategies has become increasingly important for reaching the ambitious target of an 80–95% reduction in greenhouse gas emissions by 2050. In order to limit the increase in the Earth’s average temperature, fully renewable energy systems have to be adopted in all energy sectors. As such, several countries have agreed on the necessity of developing and implementing a novel sustainable energy paradigm in the building, transport, and industrial sectors. To support this new approach to energy use and production, scientists and companies have focused their attention on the use of renewable energy technologies, improvements in functional energy use, energy efficiency, novel efficient energy conversion systems, etc. In this context, this Special Issue, “Renewable Energy Systems 2023”, aims to summarize the most recent and important advancements and studies dealing with the integration of renewable technologies into new or existing systems for the production of energy and non-energy outputs. The papers presented within this Special Issue reprint cover the potential use of renewable energy for power production, heating, cooling, water management, and transport.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

### **Open Access**

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

### **Author Focus**

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

### **High Quality & Rapid Publication**

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

### **High Visibility**

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

### **Print on Demand and Multiple Formats**

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
