ISBN 978-3-7258-0693-5 (PDF)

Clinical toxicology and post-mortem toxicology cover a broad scientific field with many opportunities and challenges. This Special Issue addresses the opportunities and challenges of detecting the exposure and intoxications of various (recreative) drugs and novel active psychoactive drugs. Currently, an increasing number of drugs have become widely available on the internet, posing questions surrounding how and where can we detect these agents and their metabolites in body fluids, as well as what the potentials and limitations of comprehensive and targeted toxicology screenings are in clinical and forensic toxicology cases. Also Special Issue addresses novel options for the clinical management of intoxicated patients, including the prevention of (re)absorption, the enhanced extracorporeal elimination of drugs, and specific antidotes. In cases of post-mortem toxicology, how do we interpret drug levels in blood and tissues, as well as address challenges related to post-mortem redistribution and degradation?

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
