In view of the key importance of biocatalysis and as a way of celebrating the 10th anniversary of *Catalysts*, the *Biocatalysis* section has taken the initiative to launch a Special Issue entitled “10th Anniversary of Catalysts: Biocatalysis in Analysis and Synthesis—Past, Present and Future”. The *Biocatalysis* section in *Catalysts* continues to grow, with 46 Special Issues and 409 articles published to date.

This milestone is a great time to both reflect on previous accomplishments and identify the next challenges and opportunities in *Biocatalysis*. As such, potential authors have been highly encouraged to be forward-thinking in their articles by proposing important questions and obstacles in their areas of interest and means of addressing them. We have also been interested in highlighting newly emerging areas for *Biocatalysis*. We believe that this Special Issue is an opportunity to identify grand themes in *Biocatalysis*.
