Integrated Computer Technologies in Mechanical Engineering – Synergetic Engineering

Edited by: Mykola Nechyporuk , Volodymyr Pavlikov and Dmytro Krytskyi

The best works were selected after the conference “Integrated Computer Technologies in Mechanical Engineering”–Synergetic Engineering (ICTM). The conference provided technical exchange between the scientific community in the form of keynote addresses, panel discussions, and a special session. In addition, participants were treated to a series of techniques that facilitated collaboration among fellow researchers. Moreover, ICTM 2021 received 110 applications from different countries.
