This proceeding in MDPI is a selection of papers presented at the 9th International Conference on Time Series and Forecasting. The main topics of this conference focus on the analysis and foundations of time series (a time series can be defined as a collection of observations of a variable recorded sequentially over time). Time series and forecasting tools are used in many fields of science, with a particular focus on ITISE (as reflected in the papers in this proceedings) on econometrics, economics and marketing, forecasting in energy and economic indices, forecasting in meteorology, etc. ITISE 2024 aims to provide scientists, engineers, faculty, and students with a discussion forum for the latest ideas and findings in the areas of foundations, theory, models, and applications for interdisciplinary and multidisciplinary research, encompassing disciplines of computer science, mathematics, statistics, forecasting, econometrics, etc., in the field of time series analysis and forecasting. Therefore, ITISE 2024 solicits high-quality original research papers (including significant works in progress) on all aspects of time series analysis and forecasting to promote the generation and development of new computational techniques and methods in the field of time series analysis and forecasting.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
