ISBN 978-3-7258-0914-1 (PDF)

Diabetic foot is a growing complication due to the global increase in diabetes mellitus prevalence; this disease affects 9.1 to 26.1 million people annually, and between 19% and 34% of people develop diabetes at least once in their life. Diabetic foot is sometimes associated with lower limb amputations and higher rates of mortality than certain types of cancer, such as breast or prostate cancer. In recent years, research has focused on managing the main complications that lead to limb loss, such as diabetic foot infections or peripheral vascular disease. The majority of studies have investigated the outcomes in the acute phase when the patient has a complicated diabetic foot ulcer. However, long-term studies, randomized control trials, and studies on prevention, both primary and secondary, are still scarce in the literature. In addition, the benefits of multidisciplinary teams on patient outcomes, health care system organization, the competences of different specialities and health care professionals, and the impact of different organizational and structural approaches are not yet well studied. This Special Issue discusses the current state of the art, addresses ongoing knowledge gaps, and focuses on ongoing controversies related to diabetic foot complications.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
