Edited by  
Francesca Musumeci

ISBN 978-3-7258-1290-5 (Hardback)  
ISBN 978-3-7258-1289-9 (PDF)

Cancer is one of the leading causes of death worldwide, yet considerable efforts are still required to make this pathology curable. Despite the limits of available approaches, kinase inhibitors have marked a turning point in the treatment of different types of tumors. This class of compounds is the first oral targeted therapy approved for neoplasia, and about 30 compounds have entered the market in the last five years. Kinase inhibitors include small molecules and monoclonal antibodies and are endowed with fewer side effects than classical antitumor agents. The potential for application of this class of drugs is substantial, and this Special Issue focuses on the discovery and development of kinase inhibitors in terms of *in silico* studies, synthesis and identification of new compounds, drug delivery, formulation studies, and biological and pharmacokinetic evaluation.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

### **Open Access**

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

### **Author Focus**

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

### **High Quality & Rapid Publication**

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

### **High Visibility**

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

### **Print on Demand and Multiple Formats**

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
