The use of concrete has played a leading role in the construction sector from the last quarter of the 19th century to today. Therefore, the main trends in the research in the concrete field are related to maintenance, safety assessment, and repairing of the existing buildings and/or infrastructures and the design of new and environmentally innovative concrete composites. This Special Issue aims to contribute to this discussion by means of experimental, numerical, and theoretical approaches. In detail, this reprint is focused on four challenges connected to concrete as a construction material. The first topic is related to the assessment of mechanical behavior of structural concrete in existing structures. The second topic deals with the advances in cement and concrete chemistry with special attention provided to sustainable development. Moreover, the Special Issue provides experimental and numerical tests for the evaluation of the structural behavior due to seismic events in order to achieve resilient design. Furthermore, the reprint includes application of artificial intelligence algorithms for assessing the optimal design concrete dosage parameters and estimating mechanical properties.

MDPI Books offers quality open access book publishing to promote the exchange of ideas and knowledge in a globalized world. MDPI Books encompasses all the benefits of open access – high availability and visibility, as well as wide and rapid dissemination. With MDPI Books, you can complement the digital version of your work with a high quality printed counterpart.

Open Access

Your scholarly work is accessible worldwide without any restrictions. All authors retain the copyright for their work distributed under the terms of the Creative Commons Attribution License.

Author Focus

Authors and editors profit from MDPI's over two decades of experience in open access publishing, our customized personal support throughout the entire publication process, and competitive processing charges as well as unique contributor discounts on book purchases.

High Quality & Rapid Publication

MDPI ensures a thorough review for all published items and provides a fast publication procedure. State-of-the-art research and time-sensitive topics are released with a minimum amount of delay.

High Visibility

Due to our global network and well-known channel partners, we ensure maximum visibility and broad dissemination. Title information of books is sent to international indexing databases and archives, such as the Directory of Open Access Books (DOAB), and the Verzeichnis Lieferbarer Bücher (VLB).

Print on Demand and Multiple Formats

MDPI Books are available for purchase and to read online at any time. Our print-on-demand service offers a sustainable, cost-effective and fast way to publish MDPI Books printed versions.
